

RetailzPOS

Full copy for every scheduled post · Launch quarter · 3 August – 1 November 2026 ·
v1.0

How to use this book

PRE-flight (before Week 1)

Week 1 (Aug 3–9) — Launch grid · Lead persona: Danny · Mindset: Unaware

Week 2 (Aug 10–16) — The 11pm ID check · Lead persona: Ray · Mindset:
Unaware → Problem-aware

Week 3 (Aug 17–23) — The Sunday case-count · Lead persona: Farah · Mindset:
Problem-aware

Week 4 (Aug 24–30) — The regular who stopped coming · Lead persona: Danny ·
Mindset: Problem-aware, closes Month 1

Week 5 (Aug 31–Sep 6) — Liquor vertical deep-dive · Lead persona: Danny ·
Mindset: Solution-aware (skeptical)

Week 6 (Sep 7–13) — Convenience multi-location · Lead persona: Farah · Mindset:
Solution-aware (skeptical)

Week 7 (Sep 14–20) — Smoke/vape SHAFT-aware marketing · Lead persona: Ray ·
Mindset: Solution-aware (skeptical)

Week 8 (Sep 21–27) — CBD vertical · Lead persona: Sam · Mindset: Solution-
aware (skeptical)

Week 9 (Sep 28–Oct 4) — First proof week · Lead persona: Priya · Mindset:
Solution-aware → Product-aware

Week 10 (Oct 5–11) — A day in the store: liquor · Lead persona: Danny · Mindset:
Product-aware

Week 11 (Oct 12–18) — A day in the store: convenience/smoke · Lead persona:
Farah / Ray · Mindset: Product-aware

Week 12 (Oct 19–25) — Flagship benchmark report launch · Lead persona: All ·
Mindset: Product-aware

Week 13 (Oct 26–Nov 1) — Open demo + Q4 readout · Lead persona: All ·
Mindset: Product-aware

Closing reference tables

How to use this book

Every unit below is one creative idea, written once. The Calendar & Tracker workbook explodes each unit into its platform-specific rows (Primary / Adapted / Mirror) with exact publish dates and specs — this book is the copy source those rows pull from. Every unit

is tagged to exactly one of the five personas (Section 9 of the Plan) and exactly one of the five messaging pillars (Section 7 of the Plan). Nothing here quotes a price, a range, or a soft price anchor, per the pricing policy in Sections 2 and 8 of the Plan.

PRE-flight (before Week 1)

PRE-U1 — Profile bios go live

Format	Persona	Pillar	Platform
Static / bio copy	All	Built for what needs an ID check	Facebook, Instagram, LinkedIn, TikTok, X, Threads

Hook (bio line): “POS built for liquor, smoke shop, convenience & CBD retail — not bolted on.”

Body: Standardized bio copy across every platform: “RetailzPOS — point-of-sale built for what actually needs an ID check. Case-break inventory, hard-block age verification, and loyalty that remembers your regulars for you. Book a 15-minute demo — link below.”

Caption: N/A (bio field, not a feed post).

Hashtags: N/A

Also runs on: Identical copy everywhere except LinkedIn, which drops the emoji-adjacent tone for a flatter B2B register.

Direction: Design/brand team to confirm profile photo and cover image use the Ink Charcoal + Moolah Gold system before this goes live anywhere.

PRE-U2 — Review-site profiles claimed

Format	Static announcement	Persona	Pillar
Static	All	A quote built around your store, not a shelf price	

Hook: “We just claimed our seat at the table — Capterra, G2, and Google are live.”

Body: Short announcement graphic: RetailzPOS profiles are now live and monitored on Capterra, G2, and Google Business. Framed as “we want you to compare us honestly,” not a plea for reviews yet — that ask comes later, once there’s product to point to.

Caption: “We’re not asking you to just take our word for it. Our Capterra, G2, and Google profiles are live — go compare us against whoever you’re already looking at. We’ll be here answering questions in the comments either way, pricing question included (we’ll just invite you to a call for that one).”

Hashtags: #RetailzPOS #IndependentRetail #POS #LiquorStore #ConvenienceStore #SmokeShop

Also runs on: Facebook, LinkedIn. Trimmed one-liner mirror on X/Threads.

Direction: Confirm all three profiles are fully built out (logo, description, screenshots) before this posts — the post is pointless if the profile it’s sending people to is thin.

PRE-U3 — Product tour teaser

Format	Video script (teaser)	Persona	Pillar
Reel/TikTok, 15–20 sec	All	Built for what needs an ID check	

On-screen hook: “We don’t publish a pricing page. Here’s what we publish instead.”

Script: - 0:00–0:03 — Quick cuts: register screen, ID scan prompt, case of bottles being broken down. - 0:04–0:10 — Voiceover: “You won’t find a price on our website. What you’ll find is this — the full product tour. Every screen, every workflow, no sales call required to see it.” - 0:11–0:16 — Cut to product-tour thumbnail/link-in-bio callout. - 0:17–0:20 — End card: “Watch the full tour. Link in bio.”

Caption: “No pricing page. No gated demo just to see what the software looks like. The full product tour is public — go watch it before you even talk to us.”

Hashtags: #RetailzPOS #POSsoftware #RetailTech #LiquorStore #SmokeShop #ConvenienceStore

Also runs on: Instagram Reels (primary), TikTok (mirror), Facebook (mirror, static thumbnail + link).

Direction: Needs the finished product-tour recording (Plan Section 23, item 5) before this can ship — do not publish this teaser until the full tour it points to is live.

Before this ships: Confirm the product tour recording is approved and live at the destination link — a teaser pointing to a broken or missing link is worse than not posting.

PRE-U4 — What's Included page goes live

Format	Link post / blog	Persona	Pillar
Static + link	All	Built for what needs an ID check	

Hook: “Everything included. Nothing bolted on. Here’s the actual list.”

Body: Announces the What's Included page (Blog Section 14, Week 1 topic) — a plain list of every feature by vertical, no prices attached, positioned as the answer to “what do I actually get.”

Caption: “We built a page with everything RetailzPOS includes — inventory, compliance, loyalty, payments, all of it — no prices, because that part’s still a conversation we’d rather have with you directly. Link in bio.”

Hashtags: #RetailzPOS #POS #RetailSoftware #IndependentRetail

Also runs on: LinkedIn (full caption), Facebook (full caption), Instagram (trimmed + link in bio), X/Threads (link only).

Direction: Requires Plan Section 23 item 1 (confirmed feature matrix) signed off before the page — and this post — can go live.

PRE-U5 — The pricing-question post, pinned

Format	Quote card	Persona	Pillar
Static, pinned to top of every profile	All	A quote built around your store, not a shelf price	

Hook / quote text: “Ask us anything. Except the price — that one’s a conversation, not a comment reply.”

Body: A single, warm, honest quote card explaining the pricing policy up front so it never has to be re-explained defensively in a comment thread later.

Caption: “We get asked what this costs pretty much daily, so let’s be upfront: we don’t publish a number, because every store’s setup is different and a flat number would either be wrong for you or wrong for us. Comment or DM and we’ll set up a quick call — no pressure, no sales script, just an honest answer for your store.”

Hashtags: #RetailzPOS #POS #RetailSoftware

Also runs on: Pinned identically on Facebook, Instagram, LinkedIn, X, Threads.

Direction: This is the single most important piece of copy in the whole book from a policy-compliance standpoint — every team member replying to comments should have this exact language memorized before Day 1 (Plan Section 23, item 2).

Week 1 (Aug 3-9) — Launch grid ·

Lead persona: Danny · Mindset: Unaware

W01-U1 — What’s actually included with RetailzPOS

Format	Persona	Pillar
Blog anchor (long-form)	Danny	Built for what needs an ID check

Hook (headline): “What’s Actually Included With RetailzPOS (No, Really — Here’s the Full List)”

Body (outline): Opens on the frustration of shopping for POS software and getting a sales call instead of a straight answer. Walks through the four core capability areas — compliance & age verification, inventory & case-break, loyalty via Moolah Points, and payments — feature by feature, no prices attached. Closes with a direct link to book a demo and a note that pricing is a call, not a page.

Caption (for the link post): “We wrote the page we wish existed when we were shopping for POS software ourselves — everything RetailzPOS includes, laid out plainly, no price hidden behind a form. Read it, then book a call if it’s a fit.”

Hashtags: #RetailzPOS #POSsoftware #LiquorStorePOS #ConvenienceStorePOS #SmokeShopPOS

Also runs on: LinkedIn (full caption + link), Facebook (full caption + link), X/Threads (trimmed one-liner + link).

Direction: SEO title tag and meta description should mirror the exact phrasing already used in the seven published comparison posts for consistency.

W01-U2 — Hard-block age verification, the 3-Layer way

Format	Persona	Pillar
Carousel, 5 slides	Danny	Built for what needs an ID check

On-graphic hook (slide 1): “A skippable prompt isn’t age verification. Here’s what actually is.”

Body (slide-by-slide): - Slide 2 — Feature: “Hard-block age verification.” - Slide 3 — Function: “The transaction physically cannot complete until a valid ID check passes. Not a prompt a rushed cashier can click past.” - Slide 4 — Benefit: “So you can staff confidently — even with a brand-new hire on a Friday night — without one missed check becoming a fine or a license review.” - Slide 5 — CTA: “See it in the product tour. Link in bio.”

Caption: “‘The cashier’s supposed to check ID’ isn’t a system — it’s a hope. Hard-block age verification means the sale literally can’t go through without a passed check. Swipe through to see how it actually works.”

Hashtags: #RetailzPOS #AgeVerification #LiquorStore #SmokeShop
#ComplianceMadeEasy

Also runs on: Instagram (primary), Facebook (mirror), LinkedIn (adapted single-image version with a more clinical caption for a B2B audience).

Direction: Use real (blurred/mocked) product screenshots for slide 3, not an illustration — this is a credibility claim and should look like the actual register screen.

W01-U3 — A day behind the counter

Format	Persona	Pillar
Reel/TikTok script, 30 sec	Danny	Built for what needs an ID check

On-screen hook: “6am delivery. 11pm ID check. Here’s a day behind the counter.”

Script: - 0:00-0:05 — Store opening, delivery truck, case of wine coming off the truck. - 0:06-0:14 — Quick montage: register ringing up sales, an ID scan prompt on screen, a customer smiling and waving on the way out. - 0:15-0:22 — Evening: register shows a low-stock alert; owner glances at phone, nods, moves on without stress. - 0:23-0:28 —

Text overlay: “Every register. Every check. Every reorder. Handled.” - 0:29–0:30 — End card: RetailzPOS logo + “Book a demo.”

Caption: “This is what a calm front desk actually looks like — not because nothing’s happening, but because the system’s handling the parts that used to eat your afternoon.”

Hashtags: #RetailzPOS #LiquorStoreLife #DayInTheLife #RetailTech

Also runs on: TikTok (primary), Instagram Reels (mirror, same cut), Facebook (mirror, native upload).

Direction: Shoot or source B-roll from a real (consented) merchant location if available this early; otherwise use stock/mocked footage clearly stylized, not presented as a specific real store.

W01-U4 — The 11pm ID check

Format	Persona	Pillar
Static / LinkedIn text post	Danny	Built for what needs an ID check

Hook: “It’s 11pm. Your newest hire is alone at the register. Do you trust the system, or the moment?”

Body: Plain-spoken LinkedIn-style post naming the real anxiety of late-shift compliance risk without a system backing up the cashier’s judgment — no product pitch until the final line.

Caption: “Every liquor and smoke-shop owner has had this thought at some point: it’s late, the newest person on staff is alone at the register, and the only thing standing between your business and a compliance problem is whether they remember to check an ID and read it right. That’s not a training problem. That’s a systems problem. RetailzPOS hard-blocks the sale until the check passes — no memory required.”

Hashtags: #RetailzPOS #ComplianceFirst #LiquorStoreOwner #SmokeShopOwner

Also runs on: LinkedIn (primary, full text), Facebook (mirror).

Direction: No image needed — text-only posts with a strong hook line outperform on LinkedIn for this register of content; keep formatting to short paragraphs, no carousel.

W01-U5 — What's your biggest headache?

Format	Persona	Pillar
Poll	All	(no single pillar — discovery/listening post)

Hook: “Running an age-restricted or high-SKU store — what’s actually the biggest headache?”

Body (poll options): Compliance/age verification · Inventory/case-break counting · Getting regulars to come back · Managing more than one location.

Caption: “Curious where the real pain is right now — vote below, and tell us in the comments if we missed one.”

Hashtags: #RetailzPOS #IndependentRetail #POS

Also runs on: Instagram Stories (primary), LinkedIn poll (adapted, B2B-toned options), Facebook (mirror as a comment-vote post since native polls have less reach there).

Direction: Results feed directly into which persona/pillar gets emphasized in Weeks 2–4 — flag results to the content team by Friday.

W01-U6 — The edge a chain can't buy

Format	Persona	Pillar
Quote card	Danny	Your regulars, remembered automatically

Quote text: “A big chain can match your prices. It can’t match knowing someone’s name.”

Body: Simple gold-on-charcoal quote card, no product mention — pure brand-voice/values post to close the week on a warmer note than the compliance-heavy posts earlier in the week.

Caption: “The relationship is the whole business. We just think it shouldn’t be the only thing standing between you and a customer who quietly drifted away.”

Hashtags: #RetailzPOS #IndependentRetail #SmallBusiness

Also runs on: Instagram (primary), Facebook (mirror), X/Threads (text-only mirror).

Direction: Design: Moolah Gold quote mark, Ink Charcoal background, per the visual guidelines cap on gold usage (Plan Section 18).

Week 2 (Aug 10-16) — The 11pm ID check · Lead persona: Ray · Mindset: Unaware → Problem-aware

W02-U1 — Hard-block vs. soft-block age verification

Format	Persona	Pillar
Blog anchor	Ray	Built for what needs an ID check

Hook (headline): “Hard-Block vs. Soft-Block Age Verification: What the Difference Actually Costs You”

Body (outline): Defines both terms plainly, walks through the real regulatory stakes (FDA/PACT Act for tobacco/vape, state ABC rules for alcohol), and gives owners four questions to ask any POS vendor — including RetailzPOS — to find out which one they actually have. Ends with RetailzPOS’s own answer stated plainly, not just implied.

Caption: “‘Does your POS check ID?’ isn’t the right question — ‘can the sale go through if it doesn’t?’ is. We wrote up the difference, and the four questions worth asking any vendor, including us.”

Hashtags: #RetailzPOS #AgeVerification #TobaccoCompliance #VapeShop #PACTAct

Also runs on: LinkedIn (full), Facebook (full), X/Threads (trimmed).

Direction: Cite FDA and PACT Act sources directly in the post, consistent with how the existing compliance blog content is sourced — no uncited compliance claims.

W02-U2 — SHAFT and TCPA, explained plainly

Format	Persona	Pillar
Carousel, 6 slides	Ray	Built for what needs an ID check

On-graphic hook (slide 1): “SHAFT. TCPA. Two acronyms that decide whether your text campaign is legal.”

Body (slide-by-slide): Slide 2 defines SHAFT (Sex, Hate, Alcohol, Firearms, Tobacco — restricted SMS content categories under CTIA guidelines). Slide 3 defines TCPA consent basics. Slide 4: what this means practically for a smoke/vape shop’s marketing texts. Slide 5: how Moolah Points campaign templates route around naming products directly, staying inside both frameworks. Slide 6: CTA to the full guide.

Caption: “Marketing a smoke/vape shop by text means working inside real restrictions — SHAFT content rules and TCPA consent requirements aren’t optional extras. Here’s what they actually mean for your campaigns, in plain English.”

Hashtags: #RetailzPOS #SmokeShop #VapeShop #SHAFT #TCPA #SMSMarketing

Also runs on: Instagram (primary), Facebook (mirror), LinkedIn (adapted single-image summary).

Direction: Legal/compliance reviewer sign-off required before this ships — this is exactly the kind of claim the pre-publish scorecard’s compliance criterion (Plan Section 20) exists for.

Before this ships: Compliance reviewer confirms the SHAFT/TCPA summary is accurate and current before this posts anywhere.

W02-U3 — The near-miss

Format	Persona	Pillar
Reel/TikTok script, 25 sec	Ray	Built for what needs an ID check

On-screen hook: “It only takes one missed check.”

Script: A composite, clearly fictionalized dramatization — not a real incident — showing a rushed cashier almost skipping an ID check during a busy rush, then a text overlay: “This is why the system checks, not just the person.” Ends on the RetailzPOS hard-block screen and a calm resolution.

Caption: “Not a real incident — a composite of what busy Friday nights actually feel like. The point isn’t that your staff can’t be trusted. It’s that nobody should have to be perfect every single time.”

Hashtags: #RetailzPOS #SmokeShop #AgeVerification #RetailCompliance

Also runs on: TikTok (primary), Instagram Reels (mirror).

Direction: Caption must state clearly this is a dramatized composite, not a real event — non-negotiable given the subject matter. Compliance reviewer sign-off required.

Before this ships: Confirm the caption’s “composite, not a real incident” disclosure is present in the on-platform caption itself, not just implied — same standard as the persona-research documents this content is grounded in.

W02-U4 — Every check, logged automatically

Format	Persona	Pillar
Static, 3-Layer Method	Ray	Built for what needs an ID check

Hook: “If an auditor asked for your last 90 days of ID checks tomorrow, could you produce them?”

Feature → Function → Benefit: Automatic audit logging → every age-verification check is timestamped and stored without staff having to do anything → so you can hand over a clean record the moment a regulator or auditor asks, instead of scrambling.

Caption: “Compliance isn’t just about catching the sale at the register — it’s about being able to prove you did, months later. Every check RetailzPOS runs is logged automatically. No spreadsheet, no memory required.”

Hashtags: #RetailzPOS #ComplianceFirst #AuditReady #SmokeShop #LiquorStore

Also runs on: LinkedIn (primary), Facebook (mirror), Instagram (adapted static).

Direction: Single clean static graphic — feature name, function line, benefit line, per the standing 3-Layer visual template.

W02-U5 — Hard-block or soft-block?

Format	Persona	Pillar
Poll	Ray	Built for what needs an ID check

Hook: “Be honest — do you actually know whether your current POS hard-blocks or soft-blocks an age check?”

Body (poll options): Yes, hard-block · Yes, soft-block · Honestly not sure · Don’t use age verification at register.

Caption: “No judgment either way — a lot of owners have genuinely never been told the difference by their vendor. That’s exactly why we wrote this week’s guide.”

Hashtags: #RetailzPOS #POS #AgeVerification

Also runs on: Instagram Stories (primary), LinkedIn poll (mirror).

Direction: Link the poll caption back to W02-U1's blog post for anyone who lands on "not sure."

W02-U6 — Built for the most regulated category in retail

Format	Persona	Pillar
Quote card	Ray	Built for what needs an ID check

Quote text: "Built for the most regulated category in retail — so you don't have to think about it."

Body: Standalone brand-voice quote card closing the week's compliance-heavy run on a reassuring note.

Caption: "Smoke and vape retail carries more regulatory weight than almost any other category we serve. That's not a footnote for us — it's the starting requirement."

Hashtags: #RetailzPOS #SmokeShop #VapeShop #ComplianceFirst

Also runs on: Instagram (primary), Facebook (mirror), X/Threads (text mirror).

Direction: Same visual template as W01-U6, consistent quote-card system throughout the book.

Week 3 (Aug 17-23) — The Sunday case-count · Lead persona: Farah · Mindset: Problem-aware

W03-U1 — Case-break inventory, explained for owners who hate spreadsheets

Format	Persona	Pillar
Blog anchor	Farah	Every case, every bottle, every SKU — accounted for

Hook (headline): “Case-Break Inventory, Explained for Owners Who Hate Spreadsheets”

Body (outline): Walks through what “case-break” actually means operationally, why general-merchandise POS systems don’t handle it natively, and how automatic case-to-unit conversion removes the weekly manual reconciliation most independent stores are still doing by hand.

Caption: “If ‘inventory count’ still means someone with a clipboard and a Sunday afternoon, this one’s for you. Here’s what automatic case-break conversion actually replaces.”

Hashtags: #RetailzPOS #InventoryManagement #ConvenienceStore #LiquorStore

Also runs on: LinkedIn (full), Facebook (full), X/Threads (trimmed).

Direction: Include a simple before/after visual — manual tally sheet vs. auto-converted dashboard — as a design asset.

W03-U2 — Case-break and reorder alerts, the 3-Layer way

Format	Persona	Pillar
Carousel, 5 slides	Farah	Every case, every bottle, every SKU — accounted for

On-graphic hook (slide 1): “A case just got broken. Here’s what happens next — automatically.”

Body: - Slide 2 — Feature: “Case-to-unit inventory conversion + AI-driven reorder alerts.” - Slide 3 — Function: “The moment a case is broken, stock auto-converts to single units. Reorder alerts are based on real sales velocity, not a fixed par level.” - Slide 4 — Benefit: “So you can trust the number on the screen instead of recounting the walk-in every week — and reorder before the shelf goes empty, not after a customer asks why you’re out.” - Slide 5 — CTA: “See the full inventory workflow in the product tour.”

Caption: “Two features, one Sunday afternoon back. Swipe through to see how case-break conversion and smart reorder alerts work together.”

Hashtags: #RetailzPOS #InventoryManagement #AIRetail #ConvenienceStore

Also runs on: Instagram (primary), Facebook (mirror), LinkedIn (adapted single-image).

Direction: Use real (or realistic mocked) product screenshots for slide 3.

W03-U3 — The Sunday count

Format	Persona	Pillar
Reel/TikTok script, 20 sec	Farah	Every case, every bottle, every SKU — accounted for

On-screen hook: “Old way vs. new way: Sunday inventory.”

Script: Split-screen format. Left side: an owner manually counting shelves with a clipboard, visibly tired. Right side, same time-stamp: an owner glancing at a dashboard on a tablet for thirty seconds, done. Text overlay: “Same Sunday. Very different afternoon.”

Caption: “We didn’t dramatize this one much — this is genuinely just what the dashboard replaces.”

Hashtags: #RetailzPOS #ConvenienceStore #InventoryManagement #SmallBusinessLife

Also runs on: TikTok (primary), Instagram Reels (mirror).

Direction: Split-screen format needs to be shot or mocked cleanly — this is a comparison claim, so both sides need to look fair, not a strawman.

W03-U4 — What shrinkage actually costs

Format	Persona	Pillar
Static (cited stat)	Farah	Every case, every bottle, every SKU — accounted for

Hook: “1–4% of convenience store revenue is lost to shrinkage. About 20% of that comes down to bad record-keeping, not theft.”

Body: A cited-statistic post, sourced to the same c-store shrinkage figure already used in RetailzPOS’s prior social content, reframed toward the record-keeping half of that number specifically — the half a POS system can actually fix.

Caption: “Theft gets the headlines, but a meaningful chunk of shrinkage is just bad record-keeping — miscounts, case-break errors, stock that was never actually tracked accurately in the first place. That’s the part automatic inventory conversion is built to close.”

Hashtags: #RetailzPOS #Shrinkage #ConvenienceStore #InventoryManagement

Also runs on: LinkedIn (primary), Facebook (mirror), Instagram (adapted static).

Direction: Confirm the shrinkage statistic’s original source citation before this ships — reuse the exact source already cited in prior RetailzPOS social content, don’t re-derive it.

W03-U5 — How long does your count take?

Format	Persona	Pillar
Poll	Farah	Every case, every bottle, every SKU — accounted for

Hook: “Honestly — how long does a full inventory count take at your store?”

Body (poll options): Under an hour · A few hours · Most of a day · I’ve genuinely lost count.

Caption: “No wrong answer — just curious how much of a Sunday this is actually eating for people.”

Hashtags: #RetailzPOS #ConvenienceStore #InventoryManagement

Also runs on: Instagram Stories (primary), Facebook (mirror).

Direction: Route the “most of a day” and “lost count” respondents toward W03-U1’s blog post via a Stories link sticker.

W03-U6 — Every case, every bottle, every SKU

Format	Persona	Pillar
Quote card	Farah	Every case, every bottle, every SKU — accounted for

Quote text: “Every case, every bottle, every SKU — accounted for.”

Body: Pillar-statement quote card, standalone.

Caption: “This is the whole pitch on inventory, honestly. Nothing fancier than that.”

Hashtags: #RetailzPOS #InventoryManagement #ConvenienceStore #LiquorStore

Also runs on: Instagram (primary), Facebook (mirror), X/Threads (text mirror).

Direction: Standard quote-card template.

Week 4 (Aug 24-30) — The regular who stopped coming · Lead persona: Danny · Mindset: Problem-aware, closes Month 1

W04-U1 — The real cost of a silent churned customer

Format	Persona	Pillar
Blog anchor	Danny	Your regulars, remembered automatically

Hook (headline): “The Real Cost of a Silent Churned Customer (and How You’d Never Know)”

Body (outline): Explains “silent churn” — a regular who simply stops coming, with no complaint or signal — and why, without visit-frequency data, it’s invisible until it’s

already a pattern. Introduces Moolah Points’ win-back automation as the mechanism that catches it. Cites the Paytronix “95% of customers return after their 4th visit” finding as the proof point for why keeping a regular past visit four matters disproportionately.

Caption: “A customer who complains gives you a chance to fix something. A customer who just quietly stops coming gives you nothing — unless something’s actually watching for it. Here’s what that costs, and what catches it.”

Hashtags: #RetailzPOS #CustomerRetention #LoyaltyMarketing #IndependentRetail

Also runs on: LinkedIn (full), Facebook (full), X/Threads (trimmed).

Direction: Cite the Paytronix statistic with its original source, consistent with how it’s already cited in Moolah Points content — do not restate it as a RetailzPOS-proprietary figure until the benchmark report (Week 12) has real data of its own.

W04-U2 — Win-back, automatically

Format	Persona	Pillar
Carousel, 5 slides	Danny	Your regulars, remembered automatically

On-graphic hook (slide 1): “A regular hasn’t been in for six weeks. Here’s what happens without you lifting a finger.”

Body: - Slide 2 — Feature: “Moolah Points win-back automation.” - Slide 3 — Function: “Automatically triggers a message once a customer misses their usual visit window.” - Slide 4 — Benefit: “So you can bring back the regular who quietly stopped coming, without personally remembering to.” - Slide 5 — CTA: “See how the campaign templates work in the product tour.”

Caption: “‘I already know my regulars’ is true — right up until one of them quietly stops showing up and you don’t notice for two months. This is the part that notices.”

Hashtags: #RetailzPOS #MoolahPoints #LoyaltyMarketing #LiquorStore

Also runs on: Instagram (primary), Facebook (mirror), LinkedIn (adapted single-image).

Direction: Screenshot the actual win-back campaign builder UI if available; otherwise use a clearly-labeled mockup.

W04-U3 — The regular who stopped coming

Format	Persona	Pillar
Reel/TikTok script, 25 sec	Danny	Your regulars, remembered automatically

On-screen hook: “You’d notice if a regular said something. Would you notice if they just... didn’t come back?”

Script: An owner behind the counter, thoughtful, looking at an empty spot at the counter where a regular used to sit on Fridays. Voiceover: “You’d remember if they complained. But silence doesn’t leave a mark — unless something’s tracking it.” Cut to a phone notification: “Win-back message sent to [customer].” Cut to the same regular walking back in the following week.

Caption: “This is the quiet problem loyalty software actually solves — not the customers you’d never forget, the ones you would.”

Hashtags: #RetailzPOS #CustomerRetention #LiquorStoreLife #SmallBusiness

Also runs on: TikTok (primary), Instagram Reels (mirror).

Direction: Keep this understated and emotionally honest rather than salesy — this is the most human unit of the month and should be shot/edited accordingly.

W04-U4 — 95% return after visit four

Format	Persona	Pillar
Static (cited stat)	Danny	Your regulars, remembered automatically

Hook: “95% of customers who make it to a fourth visit come back again. The hard part is getting them there.”

Body: Cited-statistic post (Paytronix, as used in existing Moolah Points content) reframed toward the practical implication: the first three visits are the fragile window a win-back campaign protects most.

Caption: “The data says loyalty compounds hard after visit four — which means the real leverage point is keeping someone from quietly falling off before they get there.”

Hashtags: #RetailzPOS #CustomerLoyalty #RetailData #MoolahPoints

Also runs on: LinkedIn (primary), Facebook (mirror), Instagram (adapted static).

Direction: Cite Paytronix directly in the on-platform caption or first comment, not just internally — this is a claims-accuracy scorecard item.

W04-U5 — How many regulars have you actually lost?

Format	Persona	Pillar
Poll	Danny	Your regulars, remembered automatically

Hook: “Honest question: do you know how many regulars you’ve lost this year — or would you have no way to tell?”

Body (poll options): I track this closely · I’d have a rough guess · Honestly, no idea.

Caption: “No shame in ‘no idea’ — that’s most independent stores right now, because most of them have never had a way to track it.”

Hashtags: #RetailzPOS #CustomerRetention #IndependentRetail

Also runs on: Instagram Stories (primary), LinkedIn poll (mirror).

Direction: Route “no idea” respondents to W04-U1’s blog post.

W04-U6 — Month one, wrapped

Format	Persona	Pillar
Static recap	All	(recap — no single pillar)

Hook: “One month in — here’s what we shipped and what’s next.”

Body: Transparent recap post: What’s Included page live, product tour live, review profiles claimed and monitored, four weeks of content shipped naming real category pain points. Closes with a plain statement that Month 2 goes deeper into each vertical by name.

Caption: “Month one was about making sure you could actually research us without a sales call — the page, the tour, the reviews, all live. Month two, we go deeper into your specific category. Thanks for reading this far.”

Hashtags: #RetailzPOS #POS #IndependentRetail

Also runs on: LinkedIn (primary), Facebook (mirror), Instagram (trimmed).

Direction: Pull real per-post engagement numbers into this recap where available — even rough, honest numbers beat vague enthusiasm.

W04-U7 — Ask us anything (bonus, month close)

Format	Persona	Pillar
Static / comment-prompt	All	A quote built around your store, not a shelf price

Hook: “One month of content, zero prices published. Ask us anything else.”

Body: An open Q&A prompt closing Month 1, deliberately restating the pricing policy warmly rather than defensively, inviting real questions about anything else.

Caption: “We know we’ve been consistent about one thing all month — no pricing here, that’s a call. Everything else is fair game. What do you actually want to know?”

Hashtags: #RetailzPOS #AskUsAnything #POS

Also runs on: Instagram (primary), Facebook (mirror), LinkedIn (mirror).

Direction: Whoever monitors comments should have Plan Section 23 item 2’s approved pricing answer on hand before this posts.

Week 5 (Aug 31-Sep 6) — Liquor vertical deep-dive · Lead persona: Danny · Mindset: Solution-aware (skeptical)

W05-U1 — Liquor store POS buyer’s guide 2026

Format	Persona	Pillar
Blog anchor	Danny	Built for what needs an ID check

Hook (headline): “Liquor Store POS Buyer’s Guide 2026: What to Actually Compare”

Body (outline): A genuine buyer’s guide — not a thinly-disguised sales page — walking through the real questions a liquor store owner should ask any POS vendor: hard-block vs. soft-block verification, case-break handling, loyalty mechanics, multi-location readiness. References the existing Bottle POS, NRS POS, and LMS-POS comparison posts as further reading rather than repeating them.

Caption: “Before you sit through another demo, here’s the actual checklist worth bringing — the questions that separate a liquor-specific system from a general POS with a liquor label on it.”

Hashtags: #RetailzPOS #LiquorStorePOS #POSBuyingGuide #IndependentLiquorStore

Also runs on: LinkedIn (full), Facebook (full), X/Threads (trimmed).

Direction: Internally link to the existing retailzpos-blog-01 (Bottle POS), -02 (NRS POS), and -04 (LMS-POS) posts for SEO and reader depth.

W05-U2 — The liquor-store feature bundle

Format	Persona	Pillar
Carousel, 6 slides	Danny	Built for what needs an ID check

On-graphic hook (slide 1): “Everything a liquor store actually needs, in one bundle.”

Body: Slides 2–5 each cover one feature in the 3-Layer format — hard-block verification, case-break inventory, Moolah Points win-back, dual cash/card pricing — each with its own Feature/Function/Benefit line. Slide 6 is the CTA to book a demo.

Caption: “Four features, one store, no separate vendors to manage. Swipe through the liquor-specific bundle.”

Hashtags: #RetailzPOS #LiquorStorePOS #IndependentLiquorStore

Also runs on: Instagram (primary), Facebook (mirror), LinkedIn (adapted single-image summary).

Direction: Design should visually group all four features as one connected system, not four disconnected slides — reinforces the “one system” pillar even though this unit’s primary pillar is compliance.

W05-U3 — A full shift, liquor edition (teaser)

Format	Persona	Pillar
Reel/TikTok script, 20 sec (teaser for Week 10's full version)	Danny	Built for what needs an ID check

On-screen hook: “A full shift at a liquor store, running RetailzPOS. Full version coming soon.”

Script: Fast-cut teaser — delivery, register, ID check, reorder alert, closing register — ending on “Full day, full story — Week 10.” Sets up the Week 10 whole-day workflow feature.

Caption: “We’re building the full day-in-the-life story for a few weeks from now — this is the trailer.”

Hashtags: #RetailzPOS #LiquorStoreLife #ComingSoon

Also runs on: TikTok (primary), Instagram Reels (mirror).

Direction: Reuse B-roll shot for W01-U3 where possible to avoid a second shoot this early.

W05-U4 — “I already know my regulars”

Format	Persona	Pillar
Static, objection/reframe	Danny	Your regulars, remembered automatically

Hook: “‘I already know my regulars.’ You’re right — and that’s not who this is for.”

Body: Directly addresses Danny’s core objection (from the persona research) with the exact reframe: this isn’t for the regulars already front-of-mind, it’s for the ones who quietly stopped coming six weeks ago.

Caption: “We hear this a lot, and it’s not wrong — most liquor store owners genuinely do know their regulars. This isn’t about replacing that. It’s about catching the ones you’ve stopped thinking about, because nothing told you to.”

Hashtags: #RetailzPOS #LiquorStoreOwner #CustomerRetention

Also runs on: LinkedIn (primary), Facebook (mirror).

Direction: This objection-reframe format (state the real objection, then reframe honestly) repeats for each persona this month — keep the tone consistent across all four.

W05-U5 — Liquor owners: what's your current setup?

Format	Persona	Pillar
Poll	Danny	Built for what needs an ID check

Hook: “Liquor store owners — what are you running right now?”

Body (poll options): A dedicated liquor POS · A general POS with add-ons · Still mostly manual/paper · Comment your setup.

Caption: “Genuinely curious what the mix looks like out there right now.”

Hashtags: #RetailzPOS #LiquorStorePOS

Also runs on: Instagram Stories (primary), Facebook (mirror).

Direction: Standard poll template.

W05-U6 — A liquor-owner's voice

Format	Persona	Pillar
Quote card (composite, illustrative)	Danny	Your regulars, remembered automatically

Quote text: “I don't need software to run my store. I need it to remember what I don't have time to.”

Body: An illustrative, clearly-labeled composite quote in the voice of the Danny persona — not attributed to a real named customer until a real reference customer is secured (Plan Section 23, item 3).

Caption: “This is the sentiment we hear most from liquor store owners — not ‘do it for me,’ just ‘catch what I don't have time to catch.’”

Hashtags: #RetailzPOS #LiquorStoreOwner #IndependentRetail

Also runs on: Instagram (primary), Facebook (mirror).

Direction: Caption or small-print attribution must say “composite” until swapped for a real, rights-cleared merchant quote — do not let this read as a real testimonial prematurely.

Week 6 (Sep 7-13) — Convenience multi-location · Lead persona: Farah · Mindset: Solution-aware (skeptical)

W06-U1 — Convenience store multi-location POS: what breaks at scale

Format	Persona	Pillar
Blog anchor	Farah	One system, every register, every location

Hook (headline): “Convenience Store Multi-Location POS: What Actually Breaks at Scale”

Body (outline): Covers the real operational failure points when a single-location tool gets stretched across 2-10 stores — inconsistent configuration per store, no unified reporting, loyalty that doesn’t recognize a customer across locations — and how unified multi-location reporting solves each one.

Caption: “Most POS tools work fine for one store. Here’s exactly where they start breaking once you open a second — and a third.”

Hashtags: #RetailzPOS #ConvenienceStorePOS #MultiLocationRetail

Also runs on: LinkedIn (full), Facebook (full), X/Threads (trimmed).

Direction: Reference the existing Loyverse and Square for Retail comparison posts, both of which touch multi-location limitations directly.

W06-U2 — One dashboard, every store

Format	Persona	Pillar
Carousel, 5 slides	Farah	

Format	Persona	Pillar
		One system, every register, every location

On-graphic hook (slide 1): “Three stores. One dashboard. Here’s what that actually looks like.”

Body: - Slide 2 — Feature: “Multi-location unified reporting.” - Slide 3 — Function: “One dashboard shows inventory, sales, and loyalty across every store.” - Slide 4 — Benefit: “So you can open a second or third location without doubling your admin work.” - Slide 5 — CTA: “See it in the product tour.”

Caption: “Growth shouldn’t mean your admin workload grows faster than your revenue. Swipe through what multi-location actually looks like.”

Hashtags: #RetailzPOS #MultiLocationRetail #ConvenienceStore

Also runs on: Instagram (primary), Facebook (mirror), LinkedIn (adapted single-image, this persona’s strongest LinkedIn play this month).

Direction: Use a real (or realistic mocked) multi-store dashboard screenshot — this is the single most credibility-sensitive claim of the week.

W06-U3 — Multi-shift, multi-store chaos (and calm)

Format	Persona	Pillar
Reel/TikTok script, 25 sec	Farah	One system, every register, every location

On-screen hook: “Three stores, three shift changes, one system that doesn’t care who’s logged in.”

Script: Split-screen or fast-cut across three different registers at three different times of day, each showing a different staff member, same consistent screen/workflow. Text overlay: “New hire or ten-year employee — same system, no separate training per store.”

Caption: “Staff turnover is real in this category. The system shouldn’t need to be retaught every time someone new clocks in.”

Hashtags: #RetailzPOS #ConvenienceStoreLife #MultiLocationRetail

Also runs on: TikTok (primary), Instagram Reels (mirror).

Direction: If real footage from 3 distinct locations isn't available yet, clearly stylize as illustrative rather than implying three specific real stores.

W06-U4 — “Will this even work the same at all my stores?”

Format	Persona	Pillar
Static, objection/reframe	Farah	One system, every register, every location

Hook: “‘I run 3 stores — will this even work the same at all of them?’ Fair question. Here’s the honest answer.”

Body: Directly and honestly addresses the real, materially harder product question of multi-location parity — not a glossed-over yes, a specific answer about what’s unified and what still needs per-store setup.

Caption: “This is the one question worth being specific about instead of just reassuring. Here’s exactly what’s shared across every location, and what’s configured per store.”

Hashtags: #RetailzPOS #MultiLocationRetail #ConvenienceStoreOwner

Also runs on: LinkedIn (primary), Facebook (mirror).

Direction: Content must be checked against actual current multi-location product capability before publishing (Plan Section 24, risk #6) — do not overstate parity that isn’t real yet.

W06-U5 — How many locations do you run?

Format	Persona	Pillar
Poll	Farah	One system, every register, every location

Hook: “How many locations are you running right now?”

Body (poll options): Just one · 2–3 · 4–10 · More than 10.

Caption: “Helps us know who’s reading this week’s content — drop a comment if you’re mid-expansion right now.”

Hashtags: #RetailzPOS #MultiLocationRetail #ConvenienceStore

Also runs on: Instagram Stories (primary), LinkedIn poll (mirror).

Direction: “4-10” and “more than 10” respondents should be flagged to sales as potential Priya-persona leads.

W06-U6 — One system, every register, every location

Format	Persona	Pillar
Quote card	Farah	One system, every register, every location

Quote text: “One system, every register, every location.”

Body: Standard pillar-statement quote card.

Caption: “Said plainly, because it’s exactly what it sounds like.”

Hashtags: #RetailzPOS #MultiLocationRetail #ConvenienceStore

Also runs on: Instagram (primary), Facebook (mirror), X/Threads (text mirror).

Direction: Standard quote-card template.

Week 7 (Sep 14-20) — Smoke/vape SHAFT-aware marketing · Lead persona: Ray · Mindset: Solution- aware (skeptical)

W07-U1 — SHAFT and TCPA for smoke/vape retail marketing

Format	Persona	Pillar
Blog anchor	Ray	Your regulars, remembered automatically

Hook (headline): “SHAFT and TCPA for Smoke/Vape Retail Marketing: A Plain-English Guide”

Body (outline): Expands W02-U2’s carousel into a full guide — what’s actually restricted, what a compliant campaign looks like in practice, and specifically how reward-variety mechanics (accessories, device upgrades, non-nicotine lines) are both the safer legal posture and, per existing research, the better-performing design for this customer base.

Caption: “The full guide to marketing a smoke/vape shop without tripping SHAFT or TCPA — including why rewarding variety, not just volume, is both the safer and the smarter play.”

Hashtags: #RetailzPOS #SmokeShop #VapeShop #SHAFT #TCPA

Also runs on: LinkedIn (full), Facebook (full), X/Threads (trimmed).

Direction: Compliance reviewer sign-off required before publishing, same as W02-U2.

Before this ships: Compliance reviewer confirms current accuracy of SHAFT/TCPA guidance.

W07-U2 — Reward variety, not volume

Format	Persona	Pillar
Carousel, 5 slides	Ray	Your regulars, remembered automatically

On-graphic hook (slide 1): “Rewarding pure nicotine volume feels tone-deaf. Here’s the smarter design.”

Body: - Slide 2 — The tension: most of this customer base is trying to cut back or quit, so pure-volume rewards can feel wrong — or invite scrutiny. - Slide 3 — Feature: reward-variety mechanics via Moolah Points — accessories, device upgrades, CBD/non-nicotine lines. - Slide 4 — Benefit: rewards curation and relationship, not consumption, which is both the safer legal posture and the better-performing design per prior research. - Slide 5 — CTA: see the campaign templates in the product tour.

Caption: “Loyalty in this category shouldn’t just mean ‘buy more nicotine, get points.’ Here’s a design that rewards the parts of the relationship that actually keep someone coming back.”

Hashtags: #RetailzPOS #SmokeShop #VapeShop #MoolahPoints

Also runs on: Instagram (primary), Facebook (mirror), LinkedIn (adapted).

Direction: Compliance reviewer sign-off required — this is a claim about marketing design philosophy in a heavily scrutinized category.

W07-U3 — The consultative sale

Format	Persona	Pillar
Reel/TikTok script, 20 sec	Ray	Your regulars, remembered automatically

On-screen hook: “This isn’t a transaction. It’s a five-minute consultation, every time.”

Script: Shows the genuinely consultative nature of a smoke/vape shop sale — an owner explaining device options, nicotine strength — followed by a register screen showing loyalty points added automatically, no separate step required.

Caption: “The expertise is the whole value here. The system’s job is just to make sure the loyalty side of that relationship doesn’t get lost in the conversation.”

Hashtags: #RetailzPOS #SmokeShop #VapeShop #RetailLife

Also runs on: TikTok (primary), Instagram Reels (mirror).

Direction: Keep tone respectful and expertise-forward, not salesy — matches the Ray persona’s self-image as running a “good,” well-curated shop.

W07-U4 — “Will marketing get flagged as targeting nicotine use?”

Format	Persona	Pillar
Static, objection/reframe	Ray	Your regulars, remembered automatically

Hook: “‘Will marketing get flagged as targeting nicotine use?’ — a fair, serious question. Here’s the honest answer.”

Body: Direct, non-defensive answer: campaigns route through a landing page rather than naming products directly in text, consistent with SHAFT constraints, and reward-variety framing is the deliberate legal and reputational safeguard.

Caption: “We’d rather answer this directly than have you wonder. Here’s exactly how campaign content is built to stay inside SHAFT and avoid reading as encouraging nicotine use.”

Hashtags: #RetailzPOS #SmokeShop #ComplianceFirst

Also runs on: LinkedIn (primary), Facebook (mirror).

Direction: Compliance reviewer sign-off required.

W07-U5 — What matters most in a rewards program?

Format	Persona	Pillar
Poll	Ray	Your regulars, remembered automatically

Hook: “Smoke/vape shop owners — what would matter most in a rewards program for your customers?”

Body (poll options): Accessories/device rewards · Discovery of new product lines · Simple points-per-visit · Not sure loyalty fits this category.

Caption: “The last option is a real, common view — curious how many of you land there.”

Hashtags: #RetailzPOS #SmokeShop #VapeShop

Also runs on: Instagram Stories (primary), Facebook (mirror).

Direction: “Not sure loyalty fits this category” responses are valuable qualitative signal — flag volume to the content team.

W07-U6 — Built for the most scrutinized category in retail

Format	Persona	Pillar
Quote card	Ray	Built for what needs an ID check

Quote text: “Built for the most scrutinized category in retail — so you don’t have to think about it twice.”

Body: Standard pillar-statement quote card, closing the week.

Caption: “Said once at the start of this month, worth repeating at the end of it.”

Hashtags: #RetailzPOS #SmokeShop #VapeShop #ComplianceFirst

Also runs on: Instagram (primary), Facebook (mirror), X/Threads (text mirror).

Direction: Standard quote-card template.

Week 8 (Sep 21-27) — CBD vertical · Lead persona: Sam · Mindset: Solution-aware (skeptical)

W08-U1 — CBD retail compliance and POS: the state-by-state reality

Format	Persona	Pillar
Blog anchor	Sam	Built for what needs an ID check

Hook (headline): “CBD Retail Compliance and POS: The State-by-State Reality”

Body (outline): An honest, non-oversimplified look at how fragmented CBD legality actually is state to state, why “fully compliant everywhere” isn’t a claim any honest vendor should make, and what a POS system can and can’t do to help — flexible category setup, honest compliance-first posture, and a direct pointer to confirm current state rules with counsel.

Caption: “CBD retail doesn’t get a tidy, single compliance answer — it genuinely varies by state. Here’s what that actually looks like, and where RetailzPOS can and can’t help.”

Hashtags: #RetailzPOS #CBDRetail #CBDCompliance #IndependentRetail

Also runs on: LinkedIn (full), Facebook (full), X/Threads (trimmed).

Direction: Requires Plan Section 23 item 9 (counsel-reviewed state-by-state guidance) before publishing — do not draft this from general research alone.

Before this ships: Counsel-reviewed CBD guidance confirmed and cited; no blanket compliance claim anywhere in the piece.

W08-U2 — Flexible setup, honest compliance

Format	Persona	Pillar
Carousel, 5 slides	Sam	Built for what needs an ID check

On-graphic hook (slide 1): “CBD retail doesn’t get a one-size compliance answer. Neither should your POS setup.”

Body: - Slide 2 — The reality: CBD legality is a genuine state-by-state patchwork. - Slide 3 — Feature: flexible category and compliance configuration. - Slide 4 — Benefit: so your setup reflects your actual state’s current rules, not a generic national default. - Slide 5 — CTA: talk to us about your specific state.

Caption: “We won’t tell you CBD is ‘fully compliant everywhere’ with RetailzPOS, because that’s not true anywhere. Here’s what we can actually configure for your specific situation.”

Hashtags: #RetailzPOS #CBDRetail #CBDCompliance

Also runs on: Instagram (primary), Facebook (mirror), LinkedIn (adapted).

Direction: Same counsel-review requirement as W08-U1.

Before this ships: Same as W08-U1.

W08-U3 — A day in a CBD shop

Format	Persona	Pillar
Reel/TikTok script, 20 sec	Sam	Every case, every bottle, every SKU — accounted for

On-screen hook: “Nobody’s really talking to CBD shop owners directly. Let’s fix that.”

Script: Quick, honest look at a CBD retail counter — product variety, a customer asking a genuine product question, a smooth checkout. Text overlay: “Built for a category most POS marketing ignores.”

Caption: “We looked — nobody in this category is really marketing to CBD retailers specifically. That gap is basically the whole opportunity here, and we’d rather just say so.”

Hashtags: #RetailzPOS #CBDRetail #CBDShop

Also runs on: TikTok (primary), Instagram Reels (mirror).

Direction: Use stock/illustrative footage clearly, since no reference customer exists yet for this vertical.

W08-U4 — Nobody’s talking to you. We are.

Format	Persona	Pillar
Static	Sam	A quote built around your store, not a shelf price

Hook: “Search ‘POS for CBD retail’ and see how little comes up built specifically for you.”

Body: Names the uncontested-category opportunity directly and honestly — not as a boast, but as an acknowledgment that this vertical has been underserved by every competitor in our own research.

Caption: “We’re not aware of a single major competitor building specifically for CBD retail’s compliance reality right now. That’s either a red flag or an opportunity, and we think it’s the second one — happy to talk about why.”

Hashtags: #RetailzPOS #CBDRetail #IndependentRetail

Also runs on: LinkedIn (primary), Facebook (mirror).

Direction: Keep this claim honest and bounded — “not aware of” rather than an absolute “no one,” since this is based on our own research, not an exhaustive market scan.

W08-U5 — What matters most for a CBD shop’s POS?

Format	Persona	Pillar
Poll	Sam	Built for what needs an ID check

Hook: “CBD retailers — what matters most in a POS system for you right now?”

Body (poll options): State-compliance flexibility · Product/SKU variety handling · Loyalty & repeat business · Honestly, just finding a vendor who gets it.

Caption: “This category doesn’t get asked this question often enough — genuinely want to know.”

Hashtags: #RetailzPOS #CBDRetail #CBDShop

Also runs on: Instagram Stories (primary), Facebook (mirror).

Direction: Standard poll template.

W08-U6 — Built for a category that's been overlooked

Format	Persona	Pillar
Quote card	Sam	A quote built around your store, not a shelf price

Quote text: “An uncontested category isn’t a small opportunity. It’s the clearest one.”

Body: Standard pillar-statement quote card closing the CBD week.

Caption: “Said plainly, because it’s true — and because nobody else in this category has said it to CBD retailers directly yet.”

Hashtags: #RetailzPOS #CBDRetail

Also runs on: Instagram (primary), Facebook (mirror), X/Threads (text mirror).

Direction: Standard quote-card template.

Week 9 (Sep 28-Oct 4) — First proof week · Lead persona: Priya · Mindset: Solution-aware → Product-aware

W09-U1 — Customer story: [Reference Merchant]

Format	Persona	Pillar
Blog anchor (case study)	Priya	One system, every register, every location

Hook (headline): “How [Reference Merchant] Cut Shrinkage and Recovered Lapsed Customers With RetailzPOS”

Body (outline): A real, specific case study structure — the merchant’s starting problem (in their own words), what changed after switching to RetailzPOS, and a concrete before/after result. Placeholder structure only until a real reference customer (Plan Section 23, item 3) is secured and the actual numbers are filled in.

Caption: “[Placeholder — real merchant name, quote, and results pending Section 23 reference-customer sign-off.]”

Hashtags: #RetailzPOS #CustomerStory #IndependentRetail

Also runs on: LinkedIn (full), Facebook (full), X/Threads (trimmed).

Direction: Do not publish with placeholder/composite data. This unit is blocked on a real, usage-rights-cleared reference customer.

Before this ships: Signed usage-rights clearance from the reference merchant; all figures verified as real, not illustrative.

W09-U2 — The numbers behind the story

Format	Persona	Pillar
Carousel, 5 slides	Priya	Every case, every bottle, every SKU — accounted for

On-graphic hook (slide 1): “One store’s real numbers, before and after.”

Body: Slide-by-slide breakdown of the reference merchant’s concrete before/after metrics (shrinkage reduction, lapsed-customer recovery rate, or equivalent — pending real data). CTA on final slide to read the full story.

Caption: “The full case study is worth the read, but here’s the numbers up front.”

Hashtags: #RetailzPOS #CustomerStory #RetailData

Also runs on: Instagram (primary), Facebook (mirror), LinkedIn (adapted).

Direction: Same gate as W09-U1 — real data only.

Before this ships: Same as W09-U1.

W09-U3 — In their own words

Format	Persona	Pillar
Reel/TikTok script, 30 sec (real merchant interview)	Priya	Your regulars, remembered automatically

On-screen hook: “We asked a real RetailzPOS merchant what actually changed.”

Script: Short, real, unscripted-feeling interview clips with the reference merchant talking about their actual before/after experience — no actor, no composite.

Caption: “Real merchant, real answer, no script.”

Hashtags: #RetailzPOS #CustomerStory #RealMerchants

Also runs on: Instagram Reels (primary), TikTok (mirror), LinkedIn (trimmed clip).

Direction: Requires actual filmed interview footage with signed release — cannot be produced from research alone.

Before this ships: Signed video usage release from the merchant; footage reviewed by the merchant before publish.

W09-U4 — Growing past what one store’s tools can handle

Format	Persona	Pillar
Static, persona-focused	Priya	One system, every register, every location

Hook: “The tools that got you to store #2 aren’t always the tools that get you to store #6.”

Body: Speaks directly to the Priya persona’s growth-stage reality — outgrown single-store simplicity, not yet enterprise-scale, needing unified reporting and a white-glove rollout.

Caption: “Somewhere between ‘one store, know it cold’ and ‘enterprise account team,’ there’s a real gap most tools don’t serve well. That gap is exactly who this week’s case study is for.”

Hashtags: #RetailzPOS #MultiLocationRetail #GrowthStageRetail

Also runs on: LinkedIn (primary), Facebook (mirror).

Direction: Standard persona-spotlight template.

W09-U5 — What convinced you to switch?

Format	Persona	Pillar
Poll	Priya	One system, every register, every location

Hook: “If you’ve switched POS systems before — what actually convinced you?”

Body (poll options): A specific feature gap · Price/value · A bad support experience elsewhere · Growth outgrew the old system.

Caption: “Curious what tips people over the edge — comment if it’s a story worth telling.”

Hashtags: #RetailzPOS #POS #SwitchingPOS

Also runs on: Instagram Stories (primary), LinkedIn poll (mirror).

Direction: Standard poll template.

W09-U6 — A merchant’s own words (quote card)

Format	Persona	Pillar
Quote card (real merchant quote)	Priya	Your regulars, remembered automatically

Quote text: “[Placeholder — real, attributed quote from the reference merchant, pending sign-off.]”

Body: Standard quote-card template, but this one carries real attribution once cleared — not composite/illustrative like the earlier persona quote cards.

Caption: “[Placeholder caption once real quote and attribution are confirmed.]”

Hashtags: #RetailzPOS #CustomerStory

Also runs on: Instagram (primary), Facebook (mirror).

Direction: Do not publish until real attribution and usage rights are confirmed — this is the one quote card in the book that must not stay illustrative.

Before this ships: Signed usage-rights clearance; quote reviewed and approved by the merchant.

W09-U7 — LinkedIn long-form: why proof matters more than promises (bonus)

Format	Persona	Pillar
LinkedIn long-form text post	Priya	One system, every register, every location

Hook: “We could have told you all of this in Month 1. We waited until we had a real store’s numbers instead.”

Body: A founder/marketing-lead-voice reflection on why the plan deliberately withheld proof claims until real data existed, tying back to the “no numeric targets before Week 5” measurement philosophy in the Brief.

Caption: “Full post: why we spent a month talking about problems before we ever showed you a result — and why that order matters.”

Hashtags: #RetailzPOS #IndependentRetail #B2BMarketing

Also runs on: LinkedIn only — this format doesn’t mirror well to other platforms.

Direction: Founder or marketing lead should author this in first person, not ghostwritten in brand voice alone — it reads better with a named human behind it.

Week 10 (Oct 5-11) — A day in the store: liquor · Lead persona: Danny · Mindset: Product-aware

W10-U1 — A day in a liquor store running RetailzPOS

Format	Persona	Pillar
Blog anchor (long-form workflow story)	Danny	One system, every register, every location

Hook (headline): “A Day in a Liquor Store Running RetailzPOS, Start to Finish”

Body (outline): Hour-by-hour walkthrough of a full day — morning delivery and EDI invoice reconciliation, mid-day register flow with hard-block verification, an afternoon AI reorder alert, an evening Moolah Points win-back trigger, and end-of-day reporting. Each moment ties back to a specific feature without feeling like a feature list.

Caption: “Not a feature list — a full day. Delivery to closing, here’s what actually happens on the system side while you’re running the floor.”

Hashtags: #RetailzPOS #LiquorStoreLife #DayInTheLife #POSsoftware

Also runs on: LinkedIn (full), Facebook (full), X/Threads (trimmed).

Direction: This is the payoff for the W05-U3 teaser — reference it directly in the opening line.

W10-U2 — The whole day, broken into moments

Format	Persona	Pillar
Carousel, 7 slides	Danny	One system, every register, every location

On-graphic hook (slide 1): “6am to close — one system, the whole way through.”

Body: Slides 2-6 each capture one moment from the blog’s hour-by-hour story (delivery/EDI, register/verification, reorder alert, win-back trigger, end-of-day report) as a single visual beat. Slide 7 is the CTA.

Caption: “Swipe through an entire day, moment by moment.”

Hashtags: #RetailzPOS #LiquorStoreLife #POSsoftware

Also runs on: Instagram (primary), Facebook (mirror), LinkedIn (adapted single-image summary).

Direction: Pull directly from W10-U1’s structure — this is the same story, told visually.

W10-U3 — The full day (long-form video)

Format	Persona	Pillar
Video script, 60–90 sec (long-form for Instagram/Facebook, trimmed for TikTok)	Danny	One system, every register, every location

On-screen hook: “One day. One store. Every system doing its part.”

Script: Full realization of the W05-U3 teaser and W10-U1/U2 story — real or high-quality mocked footage covering delivery, EDI reconciliation, mid-day rush with verification, an afternoon reorder alert, an evening win-back notification, and closing reports. Voiceover ties each beat to the relevant pillar without naming all five explicitly.

Caption: “The trailer from a few weeks back — here’s the full day.”

Hashtags: #RetailzPOS #LiquorStoreLife #DayInTheLife

Also runs on: Instagram (primary, full length), Facebook (mirror), TikTok (trimmed 30-sec cut).

Direction: This is the highest-production-value asset of the quarter — budget accordingly, and prioritize real merchant footage if a reference customer (Section 23) is willing and available by this point.

W10-U4 — Every feature, one day

Format	Persona	Pillar
Static recap	Danny	Built for what needs an ID check

Hook: “Everything from this quarter’s posts — actually working together in one store, one day.”

Body: A single infographic-style recap tying the day's moments back to the specific features covered across the quarter (verification, case-break, reorder alerts, Moolah Points, EDI).

Caption: "If you've been following along all quarter, this is the moment all of it comes together in one place."

Hashtags: #RetailzPOS #LiquorStorePOS #POSsoftware

Also runs on: LinkedIn (primary), Facebook (mirror), Instagram (adapted static).

Direction: Design as a clean infographic, not a busy collage — should feel like a satisfying summary, not a cram.

W10-U5 — What's your busiest hour?

Format	Persona	Pillar
Poll	Danny	One system, every register, every location

Hook: "What's the single busiest hour of your day at the register?"

Body (poll options): Morning delivery window · Lunch rush · Evening rush · Weekend, all day.

Caption: "Curious how consistent this is across different stores — comment your actual hour if the options don't fit."

Hashtags: #RetailzPOS #LiquorStoreLife

Also runs on: Instagram Stories (primary), Facebook (mirror).

Direction: Standard poll template.

W10-U6 — Every register, every hour, handled

Format	Persona	Pillar
Quote card	Danny	One system, every register, every location

Quote text: "A whole day handled isn't one feature. It's all of them working without you thinking about it."

Body: Closing quote card for the liquor whole-day-story week.

Caption: “That’s really the whole point of this week’s story.”

Hashtags: #RetailzPOS #LiquorStoreLife #POSsoftware

Also runs on: Instagram (primary), Facebook (mirror), X/Threads (text mirror).

Direction: Standard quote-card template.

Week 11 (Oct 12-18) — A day in the store: convenience/smoke · Lead persona: Farah / Ray · Mindset: Product-aware

W11-U1 — A day in a convenience/smoke shop running RetailzPOS

Format	Persona	Pillar
Blog anchor	Farah / Ray	One system, every register, every location

Hook (headline): “A Day in a Convenience/Smoke Shop Running RetailzPOS, Start to Finish”

Body (outline): Mirrors W10-U1’s structure but built around a higher-volume, multi-shift convenience or smoke-shop day — shift changes, high-SKU reorder logic, SHAFT-aware campaign triggers, multi-location reporting checked mid-day.

Caption: “Same format as last week’s liquor story — this time, a higher-volume, multi-shift day.”

Hashtags: #RetailzPOS #ConvenienceStoreLife #SmokeShopLife #DayInTheLife

Also runs on: LinkedIn (full), Facebook (full), X/Threads (trimmed).

Direction: Keep structural parity with W10-U1 so the two posts read as a deliberate matched pair.

W11-U2 — The whole day, high-volume edition

Format	Persona	Pillar
Carousel, 7 slides	Farah / Ray	One system, every register, every location

On-graphic hook (slide 1): “Multiple shifts. Thousands of SKUs. One system that doesn’t blink.”

Body: Mirrors W10-U2’s structure, moments drawn from W11-U1’s higher-volume story.

Caption: “The high-volume version of last week’s day-in-the-life — swipe through.”

Hashtags: #RetailzPOS #ConvenienceStoreLife #SmokeShopLife

Also runs on: Instagram (primary), Facebook (mirror), LinkedIn (adapted).

Direction: Same visual template as W10-U2 for consistency across the paired weeks.

W11-U3 — The full day, high-volume edition (long-form video)

Format	Persona	Pillar
Video script, 60–90 sec	Farah / Ray	One system, every register, every location

On-screen hook: “Multiple shifts, one system — a full day at a convenience/smoke shop.”

Script: Mirrors W10-U3’s production approach, this time covering shift handoffs, high-SKU reorder alerts, and a SHAFT-aware campaign send mid-shift.

Caption: “The busier, multi-shift version of last week’s video.”

Hashtags: #RetailzPOS #ConvenienceStoreLife #SmokeShopLife

Also runs on: Instagram (primary), Facebook (mirror), TikTok (trimmed cut).

Direction: Same production budget/priority as W10-U3 — this is the second of the quarter’s two flagship video assets.

W11-U4 — Every feature, high-volume edition

Format	Persona	Pillar
Static recap	Farah / Ray	Every case, every bottle, every SKU — accounted for

Hook: “Same quarter’s features, this time in a high-SKU, multi-shift store.”

Body: Mirrors W10-U4’s recap structure for the convenience/smoke context.

Caption: “The high-volume companion to last week’s recap graphic.”

Hashtags: #RetailzPOS #ConvenienceStorePOS #SmokeShopPOS

Also runs on: LinkedIn (primary), Facebook (mirror), Instagram (adapted static).

Direction: Same infographic template as W10-U4.

W11-U5 — Staff turnover: how bad is it, really?

Format	Persona	Pillar
Poll	Farah	One system, every register, every location

Hook: “Honestly — how often are you training a new hire on the register?”

Body (poll options): Rarely, low turnover · A few times a year · Monthly or more · Constantly.

Caption: “This one shapes a lot of what we build on the training/onboarding side — genuinely useful to know.”

Hashtags: #RetailzPOS #ConvenienceStoreLife #StaffTurnover

Also runs on: Instagram Stories (primary), Facebook (mirror).

Direction: Standard poll template.

W11-U6 — High volume, zero chaos

Format	Persona	Pillar
Quote card	Farah / Ray	

Format	Persona	Pillar
		One system, every register, every location

Quote text: “High volume doesn’t have to mean high chaos.”

Body: Closing quote card for the second day-in-the-life week.

Caption: “The whole point of this pair of weeks, said in one line.”

Hashtags: #RetailzPOS #ConvenienceStoreLife #SmokeShopLife

Also runs on: Instagram (primary), Facebook (mirror), X/Threads (text mirror).

Direction: Standard quote-card template.

Week 12 (Oct 19-25) — Flagship benchmark report launch · Lead persona: All · Mindset: Product-aware

W12-U1 — The State of Independent Retail POS 2026

Format	Persona	Pillar
Blog anchor (flagship report launch)	All	A quote built around your store, not a shelf price

Hook (headline): “The State of Independent Retail POS 2026: What We Learned From Our Own Merchant Data”

Body (outline): Launches the flagship benchmark report (Plan Section 14, Week 12) — 2-3 headline stats ungated, full report gated behind email/phone capture, sourcing methodology (sample size, date range, anonymization) stated upfront for credibility. Structure and content depend entirely on real, validated install-base data (Plan Section 23, item 8).

Caption: “We pulled real, anonymized data from our own merchant base to answer a question nobody in this category has answered publicly yet. Three headline stats are free to read right now — the full report is gated, because building this took real work.”

Hashtags: #RetailzPOS #RetailBenchmark #IndependentRetail #RetailData

Also runs on: LinkedIn (full), Facebook (full), X/Threads (trimmed).

Direction: Entirely blocked on Plan Section 23 item 8 (data access timeline). Do not draft with placeholder/invented figures — if data volume doesn't support a full report by this date, ship the “early look” (3-5 headline stats) version instead, per the Plan's fallback.

Before this ships: Real, validated data confirmed and sourced; sample size and methodology disclosed in the piece itself.

W12-U2 — Three headline stats, free

Format	Persona	Pillar
Carousel, 4 slides	All	A quote built around your store, not a shelf price

On-graphic hook (slide 1): “We pulled our own data. Here are three numbers, no email required.”

Body: Slides 2-4 each present one of the report's ungated headline stats, visually bold, one number per slide. Final line points to the gated full report.

Caption: “Three real numbers from our own merchant data, free to read. The rest of the report is worth the email.”

Hashtags: #RetailzPOS #RetailBenchmark #RetailData

Also runs on: Instagram (primary), Facebook (mirror), LinkedIn (adapted single-image).

Direction: Same data-gate as W12-U1.

Before this ships: Same as W12-U1.

W12-U3 — We asked our own data

Format	Persona	Pillar
Reel/TikTok script, 20 sec	All	A quote built around your store, not a shelf price

On-screen hook: “Nobody’s published real data on this category. So we pulled our own.”

Script: Short, confident announcement-style video — quick cuts of a dashboard/data visual, voiceover stating the report exists and is free to start reading. Ends on the report’s landing page.

Caption: “This one took actual work to build — worth thirty seconds of yours.”

Hashtags: #RetailzPOS #RetailBenchmark #RetailData

Also runs on: TikTok (primary), Instagram Reels (mirror).

Direction: Same data-gate as W12-U1.

Before this ships: Same as W12-U1.

W12-U4 — Trade press pickup amplification

Format	Persona	Pillar
Static / link post	All	A quote built around your store, not a shelf price

Hook: “[Trade publication] picked up our benchmark report.”

Body: Amplifies whichever trade outlet (Retail Dive, CSP Daily News, Convenience Store News, or Beverage Dynamics, per the existing guest-posting/distribution strategy) covers the report first.

Caption: “Grateful to see [Trade publication] cover this — read their take, then read the full report.”

Hashtags: #RetailzPOS #RetailBenchmark #TradePress

Also runs on: LinkedIn (primary), Facebook (mirror).

Direction: Contingent on actual press pickup — do not publish a placeholder version; hold this slot open and fill it once real coverage lands, or replace with additional organic amplification if it doesn’t.

W12-U5 — What do you think we found?

Format	Persona	Pillar
Poll (prediction, pre-reveal engagement)	All	A quote built around your store, not a shelf price

Hook: “Before you read the report — guess: what’s the #1 reason merchants say they switched to us?”

Body (poll options): Compliance/age-verification gaps elsewhere · Inventory/shrinkage pain · Loyalty that didn’t work · Outgrew their old system.

Caption: “Guess first, then go read the real answer in the report.”

Hashtags: #RetailzPOS #RetailBenchmark

Also runs on: Instagram Stories (primary), LinkedIn poll (mirror).

Direction: Poll options must match what the real data actually shows once available — do not lock this copy until report data is confirmed.

W12-U6 — The headline stat, standalone

Format	Persona	Pillar
Quote card	All	A quote built around your store, not a shelf price

Quote text: “[Placeholder — the single strongest headline stat from the real report, once confirmed.]”

Body: Standalone, boldest-possible presentation of the report’s single best stat.

Caption: “[Placeholder caption once the real figure is confirmed.]”

Hashtags: #RetailzPOS #RetailBenchmark #RetailData

Also runs on: Instagram (primary), Facebook (mirror), X/Threads (text mirror).

Direction: Same data-gate as W12-U1.

Before this ships: Same as W12-U1.

W12-U7 — Why we built this (bonus, founder voice)

Format	Persona	Pillar
LinkedIn long-form text post	All	A quote built around your store, not a shelf price

Hook: “Nobody in this category has published real data. We decided that shouldn’t stay true.”

Body: Founder/leadership-voice reflection on why the benchmark report was worth building — the same “become the citable source” logic from the report’s own groundwork document, in plain first-person language.

Caption: “Full post: why we spent part of this quarter building a data report instead of another ad.”

Hashtags: #RetailzPOS #IndependentRetail #RetailData

Also runs on: LinkedIn only.

Direction: Founder or marketing lead authored, first person, same approach as W09-U7.

Week 13 (Oct 26–Nov 1) — Open demo + Q4 readout · Lead persona: All · Mindset: Product-aware

W13-U1 — Q3 in review: what we learned from this quarter’s demos

Format	Persona	Pillar
Blog anchor	All	(quarter close — no single pillar)

Hook (headline): “Q3 in Review: What We Learned From This Quarter’s Demos”

Body (outline): An honest, numbers-forward retrospective — what worked, what didn’t, real (even if modest) demo-request numbers, and what it sets up for Q4. Ties back to the Brief’s true-north metric (demo requests) and the “no targets before Week 5” measurement philosophy.

Caption: “Thirteen weeks in — here’s what actually happened, numbers included, and what we’re doing differently next quarter.”

Hashtags: #RetailzPOS #QuarterlyReview #IndependentRetail

Also runs on: LinkedIn (full), Facebook (full), X/Threads (trimmed).

Direction: Use real, actual per-week/per-month numbers pulled from the Calendar & Tracker workbook’s KPI Tracker sheet — this post exists specifically to be honest, not to perform success.

W13-U2 — The five pillars, recapped

Format	Persona	Pillar
Carousel, 6 slides	All	(recap — all five pillars)

On-graphic hook (slide 1): “Thirteen weeks, five things we kept saying. Here they are, together.”

Body: Slides 2-6 each restate one of the five messaging pillars from Plan Section 7, paired with its strongest-performing post from the quarter (per the Content Mix Tracker).

Caption: “If you only remember five things from this quarter, let it be these.”

Hashtags: #RetailzPOS #POSsoftware #IndependentRetail

Also runs on: Instagram (primary), Facebook (mirror), LinkedIn (adapted).

Direction: Pull actual top-performing post examples once Post Grading data exists — don’t guess which ones resonated.

W13-U3 — Watch us, live

Format	Persona	Pillar
Reel/TikTok script, 20 sec (event announcement)	All	A quote built around your store, not a shelf price

On-screen hook: “No script. No pre-recorded demo. Watch it happen live, and ask anything.”

Script: Announces the open live demo — date, time, and format — with a direct invitation to bring hard questions, including pricing questions (which get answered live with the same warm, honest, call-inviting approach as everywhere else).

Caption: “One live demo, open to anyone. Bring your real questions — including the pricing one.”

Hashtags: #RetailzPOS #LiveDemo #POSsoftware

Also runs on: Instagram Reels (primary), TikTok (mirror), LinkedIn (adapted announcement).

Direction: Confirm the live demo platform/logistics are fully locked before this posts.

W13-U4 — Open demo: the details

Format	Persona	Pillar
Static / event post	All	A quote built around your store, not a shelf price

Hook: “Open live demo: [date/time]. Everyone welcome, no sales pitch required to attend.”

Body: Straightforward event-details post — date, time, registration link, what to expect.

Caption: “Save the date. Bring your real questions about your real store.”

Hashtags: #RetailzPOS #LiveDemo #POSsoftware

Also runs on: LinkedIn (primary), Facebook (mirror), Instagram (mirror).

Direction: Pin this post across all profiles for the week leading up to the event.

W13-U5 — What do you want to see on the open demo?

Format	Persona	Pillar
Poll	All	A quote built around your store, not a shelf price

Hook: “What do you actually want to see covered on the open demo?”

Body (poll options): Compliance/age verification · Inventory/case-break workflow · Loyalty/Moolah Points · Multi-location setup.

Caption: “Tell us now, we’ll make sure it’s covered live.”

Hashtags: #RetailzPOS #LiveDemo

Also runs on: Instagram Stories (primary), LinkedIn poll (mirror).

Direction: Results should directly shape the live demo’s agenda — share results with whoever’s running the demo by mid-week.

W13-U6 — Thank you, and see you in Q4

Format	Persona	Pillar
Quote card	All	(quarter close)

Quote text: “Thirteen weeks of naming real problems, in real categories, for real owners. On to Q4.”

Body: Closing quote card for the entire 90-day arc — warm, plain, forward-looking.

Caption: “Thanks for reading this far, genuinely. Q4 targets get set from here — details soon.”

Hashtags: #RetailzPOS #IndependentRetail #ThankYou

Also runs on: Instagram (primary), Facebook (mirror), LinkedIn (mirror), X/Threads (text mirror).

Direction: Standard quote-card template, closing the book.

W13-U7 — Demo day reminder (bonus)

Format	Persona	Pillar
Static / day-of reminder	All	A quote built around your store, not a shelf price

Hook: “Today. [Time]. Link’s live — come ask anything.”

Body: Simple day-of reminder post for the open demo, published the morning of the event.

Caption: “Starting soon — join here.”

Hashtags: #RetailzPOS #LiveDemo

Also runs on: All platforms, identical short copy.

Direction: Schedule for the morning of the actual event date; pair with a Stories countdown sticker on Instagram.

Closing reference tables

CTA reference

CTA type	Approved wording	Used when
Demo request (primary, default)	“Book a 15-minute demo” / “See it in the product tour”	Every unit unless otherwise noted
Pricing-question response	“We don’t publish a number — every store’s setup is different. Comment or DM and we’ll set up a quick call.”	Any public comment or DM asking about cost
Review-site direction	“Compare us on Capterra / G2 / Google — we’ll be honest either way.”	Review-site and comparison-adjacent content
Event RSVP (Week 13 only)	“Save your spot — link in bio.”	Open demo announcement and reminder units
